		<b>Total Cost = \$53.72</b>	<b>Overall Ease of Access Score = 91.67%</b>

**Overall Comments/Conclusions:** This ease of access score of 91.67% for a grand total of \$53.72 is a relatively positive outcome. Overall, I look upon this data favorably, especially considering how expensive textbooks are for other classes. Beyond that, I would add that this customer in particular (myself) chose the most expensive route possible - if I had chosen to forego printing every reading and ordering every book, I could have avoided costs and made these texts even more accessible.
